

The Case for Bolten

I'm sick and tired of writing about why Seymour Bolten is the logical choice for the man who authored the JFK Assassination. It should be obvious to all who care to look. In this piece I am going to list all the factors that round out why he is the logical choice. If you can find a better candidate let me know.

1. He was a bright guy. He attended DeWitt Clinton HS (1938), NYU (1942), and Harvard (1950).
2. He spent 2.5 years in a POW camp in Szubin, Poland where officers spent the majority of their free time planning escapes.
3. He was fluent in Russian, invaluable in integrating with the Russian community in the DFW area. Bolten was fluent in Russian principally because his parents were Russian immigrants.
4. He was efficient, hard working and thorough. When you look at his son, Joshua Bolten, you are viewing a clone of Seymour Bolten.
5. He worked with Lucius Clay in Post WWII Germany. Here we would learn valuable organizational skills. Here he would also be given the opportunity to meet movers and shakers. He would also most likely meet Israelis involved in moving Jews from Europe to Palestine.
6. He most likely met Frank Sturges in Germany. Sturges was in Lucius Clay's color guard.
7. He was a POW mate of Amon Carter, Jr. in Szubin, Poland. Amon Carter hired Marguerite Oswald as a nanny in 1963. Amon Carter, Jr. was connected to the Texas power brokers. The Amon Carter family was close to IB Hale, a football star. It was IB Hale's wife, Virginia, who got LHO his job at Leslie Welding.
8. Bolten was Jewish. This would be invaluable in integrating with Jews in Dallas, such as Abraham Zapruder, Sam Bloom, Morris I. Jaffe, Jack Ruby, and Rabbi Silverman. Rabbi Silverman attended Yale and knew George Bush's older brother. Silverman was also a member of Haganah. He was also Jack Ruby's rabbi at Shearith Israel.
9. Bolten's boyhood friend was Max Kampelman. Bolten worked in Kampelman's father's deli as a young man. MK went on to become a lawyer and a big shot in Jewish affairs in the United States and Israel. Reportedly he was at one time Golda Meir's attorney. This gave Bolten an "in" into the higher level politics of Israel. It puts him in the room.
10. Bolten was a good friend of George Herbert Walker Bush. That's probably why their sons became friendly. George Herbert Walker Bush was involved with Manuel Noriega in Panama. Another individual who was involved in Panama was Mike Harari of Mossad. It's entirely realistic to believe that Bolten would have known of Mike Harari. This is significant because the profile of Walkie-Talkie man looks

remarkably like Mike Harari. The Accomplice looks like Yitzhak Hofi. These two men Hofi and Harari were friends.

11. Bolten was deputy Chief Of Station CIA in Bonn for 5 years from 1955 to 1960. There is a six month overlap between Bolton leaving and Oswald arriving in Russia. It makes sense that Bolten would be aware of Oswald's presence in Russia. *Somebody* had to recruit Oswald onto the assassination team.
12. Seymour Bolten's son, Joshua, mentored Ted Cruz at Princeton. Ted Cruz is the son of Rafael Cruz who I believe was handing out leaflets with Oswald in New Orleans. No, I'm not talking about the person who Donald Trump erroneously pointed out as Ted Cruz's father. I'm talking about a completely different individual. As we all know, Rafael Cruz was somewhere in either Dallas or New Orleans between 1960 and 1963. Cruz stated that he was opposed to Fidel Castro. Rafael Cruz was also working in the petroleum industry. I will argue that Rafael Cruz was indeed a CIA collaborator going way back to his days in a Batista prison. Rafael Cruz's father reportedly worked at RCA, a known front company for the CIA.
13. Bolten was politically connected. He wasn't just a field operative. He morphed into administration. He was a close associate of Richard Helms.
14. When Nixon hosted a state dinner for Willy Brandt, Bolten was invited. Also invited was Lucius Clay. What this illustrates is that Bolten was not some minor player.
15. Through his connections with GHWB, Bolten would be able to meet the Texas power brokers.
16. Bolten was in the Nixon White House as Watergate was winding down. Bolten worked in association with BNDD on a task force. He worked closely with Egil "Bud" Krogh. Egil Krogh's father was a trade association associate of Clay Shaw. Clay Shaw wasn't just a gay guy from the Quarter; he was New Orleans ambassador to the world. He knew everybody, and everybody knew him. What does this association mean? Not much; only that Bolten worked within a circle of people with common interests.
17. Watergate is wedded to the JFK Assassination in ways that we are not quite certain. The men who conducted the Watergate break-in were for the most part CIA men or CIA associates. Virgilio Gonzalez, Eugenio Martinez, and Bernard Barker were all anti-Castro Cubans. Frank Sturges was another member of the team. As was Howard Hunt. Bolten would have known all these men. So what was the real reason Bolten was there in the Nixon White House? To keep tabs on what was going down with his buddies?
18. Bolten was a Scoop Jackson Repuplicrat. His close friends were also Scoop Jackson Republicrats. These people were the progenitors of the neo-cons and the neo-libs. They placed their faith in the CIA, the military industrial complex and the American Empire. Richard Perle was a later member of the Scoop Jackson team.
19. Bolten was assigned to the Latin American theater in the early 1960s. He was very much aware of what was going on in Cuba.
20. Bolten was at the right age to plan the assassination. Born in 1922, he would have been 41 in 1963. This gives him the right combination of vigor and clout. He was old enough to have the right experience, the right contacts and the right amount of clout to get things done. A 30 year old is too young and too inexperienced; a 50 year old is too fixed and inflexible.

21. The CIA and its officers do not talk about him. He is like a ghost.
22. Bolten himself is discreet. He writes no books. He gives no interviews. He remains quiet and in the background.

Now, of course, these are only associations, and associations do not prove causality. But they do suggest that Bolten would make an excellent choice to plan JFK's assassination. Bolten was hard working, thorough and smart. He was also not a prima donna. He preferred to stay in the background and let his work do his talking. You could hardly find a better choice to plan the assassination. Now, if you don't believe in conspiracy, that's fine; but if you do, you must agree that *someone* had to plan it.

Once again, it is absolutely essential to include Israel in the equation because CIA is using the shield of antisemitism to hide its dirty activities. Israel while not the initiator of the assassination certainly had an opinion. Israel certainly threw in its own two cents. Israel was certainly consulted.

It's essential to understand what Israel was and is in the context of the American Empire. Israel is the Empire's man in the Middle East. It is really America East. What happens in Israel is not decided solely by the leaders in Israel. The United States is heavily involved in what transpires in Israel. I'm sure the British are given a vote too.

We have been led to believe that Israel was created for the Jews. Yes, this is true, but that was only a secondary goal. The true purpose was to give the western powers a beachhead into the Middle East. Israel's true function from the perspective of power elite is to control the oil and gas assets in the Middle East, the Suez Canal and the eastern Mediterranean. The Jews were used to colonize Palestine.

Palestine was colonized by the Jews because the power elite put the money behind them. Moving hundreds of thousands of people into Palestine costs money, real money. Moving hundreds of thousands of people into Palestine requires organization. It was the power elite who provided that money and organization.

Many Jews have been led to believe that Israel exists for them. This is largely true but only within the context of what the power elite choose for them. The power elite really don't care about Jews at all; they only want the money and power; if they can use Jews to get it, they will. This is important because when the day arrives that oil, gas and the Suez Canal cease to become important, the power elite will abandon the Jews faster than you can drop a hot potato.

Until then Israel is an important part of the American Empire. Not only does the United States have a say in what goes on in Israeli, Israel has a say on what goes on in the United States. So do the British. Think of America not as a separate country anymore, but a supranational state spreading its wings over the Pacific and Atlantic oceans. The

vital cogs in the American Empire are US, GB, CA, AU, NZ, Japan, Taiwan, South Korea, Philippines, and Israel.

So when the decision for regime change is made, our partners are consulted. Israel is one of those partners.

When John Kennedy voiced his displeasure at Israel having nuclear weapons, he threatened not only Israel's vital interests but the interests of the American Empire itself. Yes, Israel offered its opinion that regime change might be necessary, but they were but one vote in the ultimate decision to remove JFK. Many others felt similarly.

Seymour Bolten was an agent of the CIA, and the CIA works for the power elite, not the American people. The power elite are the architects of the modern supranational state otherwise known as the American Empire. It's also called the New World Order.
